

# Aber Robotics Club - Upcoming Events

## Projects

Projects have started on the 15th November 2017, a list of the available projects can be found at <http://students.aberrobotics.club/projects> if you have not already signed up.

Once you have decided on a project, please visit <http://students.aberrobotics.club/github> where you can sign up and add your GitHub username. We will be saving project files on GitHub which makes everything centralised.

## Computer Aided Design (CAD) Workshop

We will be holding a CAD workshop for anyone wishing to do robotic designs on 29th Nov at the usual club times. We are still waiting for parts to arrive for you to be able to build your own robots, this should be a good course if you are interested in designing your chassis.

## Robo Sumo Competition

On Wednesday the 6th of December we will be hosting a competition for groups involved with the sumo robots. This will be in the Part 1 lab, physics (MP 1.00) starting at 1:30PM.

For more information about the event and the Sumo project please visit <http://sumo.aberrobotics.club>

## BCS - Show and Tell

The BCS Student Show and Tell is an event where students of all ages can come along and present their work or anything they find interesting in the field of Computing and IT.

It would be great if we could have a few groups talking about the projects you are working on and what you intend to do. If you would like to present please let Tomos ([tof7@aber.ac.uk](mailto:tof7@aber.ac.uk)) or the event organiser Nicholas Dimonaco ([nid16@aber.ac.uk](mailto:nid16@aber.ac.uk)) know.

Attendance is free, please register at <http://bcs.aberrobotics.club> if you would like to attend. This is so they know how much beer is needed!

If you have any questions, don't hesitate to contact us.
